Ohio Fire Code Update – Required for all Fire Inspectors

The Fire Code Academy is hosting onsite "Fire Code Update" training programs throughout the State of Ohio in July and August 2018. The training is focused on key important Ohio modifications/changes to the International Fire Code that have been incorporated into the 2017 Ohio Fire Code.

Cost \$25.00

This Fire Code Update meets the requirements of Ohio Administrative Code 4765-20-12(E) which requires 4 hours of code update training for fire safety inspectors when there is a new adoption of the Ohio Fire Code.

The Fire Code Academy will issue certificates for the update training program through our educational partners and fire program charters (Great Oaks and Cuyahoga Community College).
